Subject : Dairy Technology Society of India - Making it a vibrant organization: Enrollment of Institutional, Life, Ordinary and Student Members

Dear Sir,
Greetings!

Dairying is an instrument for change in the social and economic status of people in a country like India. Over the last four decades, there have been tremendous changes in the dairy sector of the country. India now occupies 1st position in milk production in the world. In the process of attaining these distinctions, the Dairy Technologists of the country have played a monumental role. In this age of liberalization and globalization, there will be renewed focus on product diversification, value addition, quality improvement and export promotion, which will define a more challenging role for the professionals engaged in the pursuit of Dairy Technology and allied sciences.

Dairy Technology is the industrial non-farm phase of the tremendously large, dynamic and complex Dairy Industry. This phase represents a combination of Dairy Chemistry, Dairy Microbiology, Engineering, Food Technology, business, and art as applied to all dairy and dairy-type foods and their industries.

In order to promote and develop a forum for the scientific discussion and exchange of ideas in the field of Dairy Technology, it was strongly felt that a Dairy Technology Society of India should be constituted, which could generate a sense of brotherhood among the fellow professionals. Accordingly, initiative has been taken at National Dairy Research Institute, Karnal to form such a Society with National Mandate. In order to facilitate the registration process and initiate the groundwork for developing such a forum, the office bearers were nominated for a period of one year, after which regular elections would be held, for which all the Society Members throughout the country will be welcome to participate.

Accordingly, I urge you all who are engaged in Dairy Science & Industry to enroll yourself as an Institutional, Life, Ordinary or Student Member so that the Society can derive the benefit of your strong support and sustenance. Membership form along with details is enclosed.

I shall be highly thankful if you would come forward and be a partner in this noble venture of strengthening the **Dairy Technology Society of India** through your help and make it a vibrant organization to contribute towards the nation's prosperity through dairying.

For further information/clarification, please feel free to write at the following address:

Dr. Alok Jha, Secretary
Dairy Technology Society of India
Division of Dairy Technology,
National Dairy Research Institute
